END17PROSR | V1 MARCH 2017

A photograph of a modern kitchen. On the left, a white Vaillant boiler is mounted on a wall with stone tiles. Below it is a stainless steel kitchen sink with a curved faucet. In the foreground, a wooden cutting board with vegetables and a stainless steel pot are on the countertop. On the right, a dark kitchen cabinet contains a built-in oven and a glass display cabinet with bottles. A semi-transparent white box with text is overlaid on the right side of the image.

ecoTEC pro

High efficiency
combination boiler

COMBINATION BOILERS

Best for two to four people

Best for up to two bathrooms

Cost-effective

No need for separate cylinder or loft tank

Prevents frost damage

What are the advantages?

'Combi' is short for combination, because the boiler heats both hot water and provides central heating in combination.

A combi boiler heats water as you draw it from the tap. It doesn't need a water storage tank or a cylinder because the boiler's connected directly to the water mains, heating water as it's needed.

Combi boilers are best suited to homes with fewer than two bathrooms. Homes that need larger supplies of hot water are

usually better suited to a system or open vent boiler with a hot water cylinder.

Combi boilers are cost effective and energy efficient, with a compact size that's ideal for smaller properties where space is limited. Because there's no need for a water storage tank or a hot water cylinder, a combi boiler can free up space for conversion, storage and living.

ecoTEC pro

High efficiency combination boiler range

This is the combination boiler designed for ease all round. Providing instant hot water with no need for a tank or cylinder, it's small enough to fit almost anywhere, and there's an ecoTEC pro combination boiler for almost every situation. Installation can be quick, giving you hassle-free heating in one or two days, offering years of high-efficiency, low-cost heating. It's eco by name and by nature.

Key features

- The ecoTEC pro boiler has been awarded the Which? Best Buy 2017
- ErP A rated boiler with up to 93% efficiency, helping you to reduce your carbon footprint and save money on your fuel bills
- Rapid hot water delivery of up to 12.3 litres per minute, heating only the water you require
- Compact and lightweight for exceptional siting and flexibility, for a kitchen-friendly, stylish design
- Quality German design and engineering which is manufactured at award-winning UK facilities
- Designed for a peaceful home, the ecoTEC pro is awarded the Quiet Mark for its reduced noise
- Compatible with Vaillant's vSMART™ app based control for heating on the go

Dimensions

Model	24/28/30
Boiler height (mm)	720
Boiler width (mm)	440
Boiler depth (mm)	338
